

The background image shows a wide river or stream flowing from the center-left towards the right. The banks are lined with dense green trees and bushes. In the foreground, there are tall, green, blade-like plants. The sky is overcast with heavy clouds.

Plateau Water Planning Group

April 20, 2023

The background of the slide is a photograph of a natural landscape. A river or stream flows from the center-left towards the right, surrounded by dense green trees and bushes. The sky is overcast with heavy clouds. A large, semi-transparent white circle covers the upper half of the slide, containing the main text.

Plateau Water Planning Group

April 20, 2023

Item IV. C

Political Entity Report

Since Last Meeting

- Submitted payment reimbursement report/payment request #3
- TWDB approved budget amendment (recategorize expenses)
- Executed ILA with Kerr County for \$23,865 (salary and admin expenses)
- Developed proposal for sound an audio improvements (Item X)

WSP Technical Consultant Presentation

PLATEAU RWPG Meeting

April 20, 2023

Update on Regional Water Planning Schedule

Anticipated timeline of upcoming work in 2023 & 2024

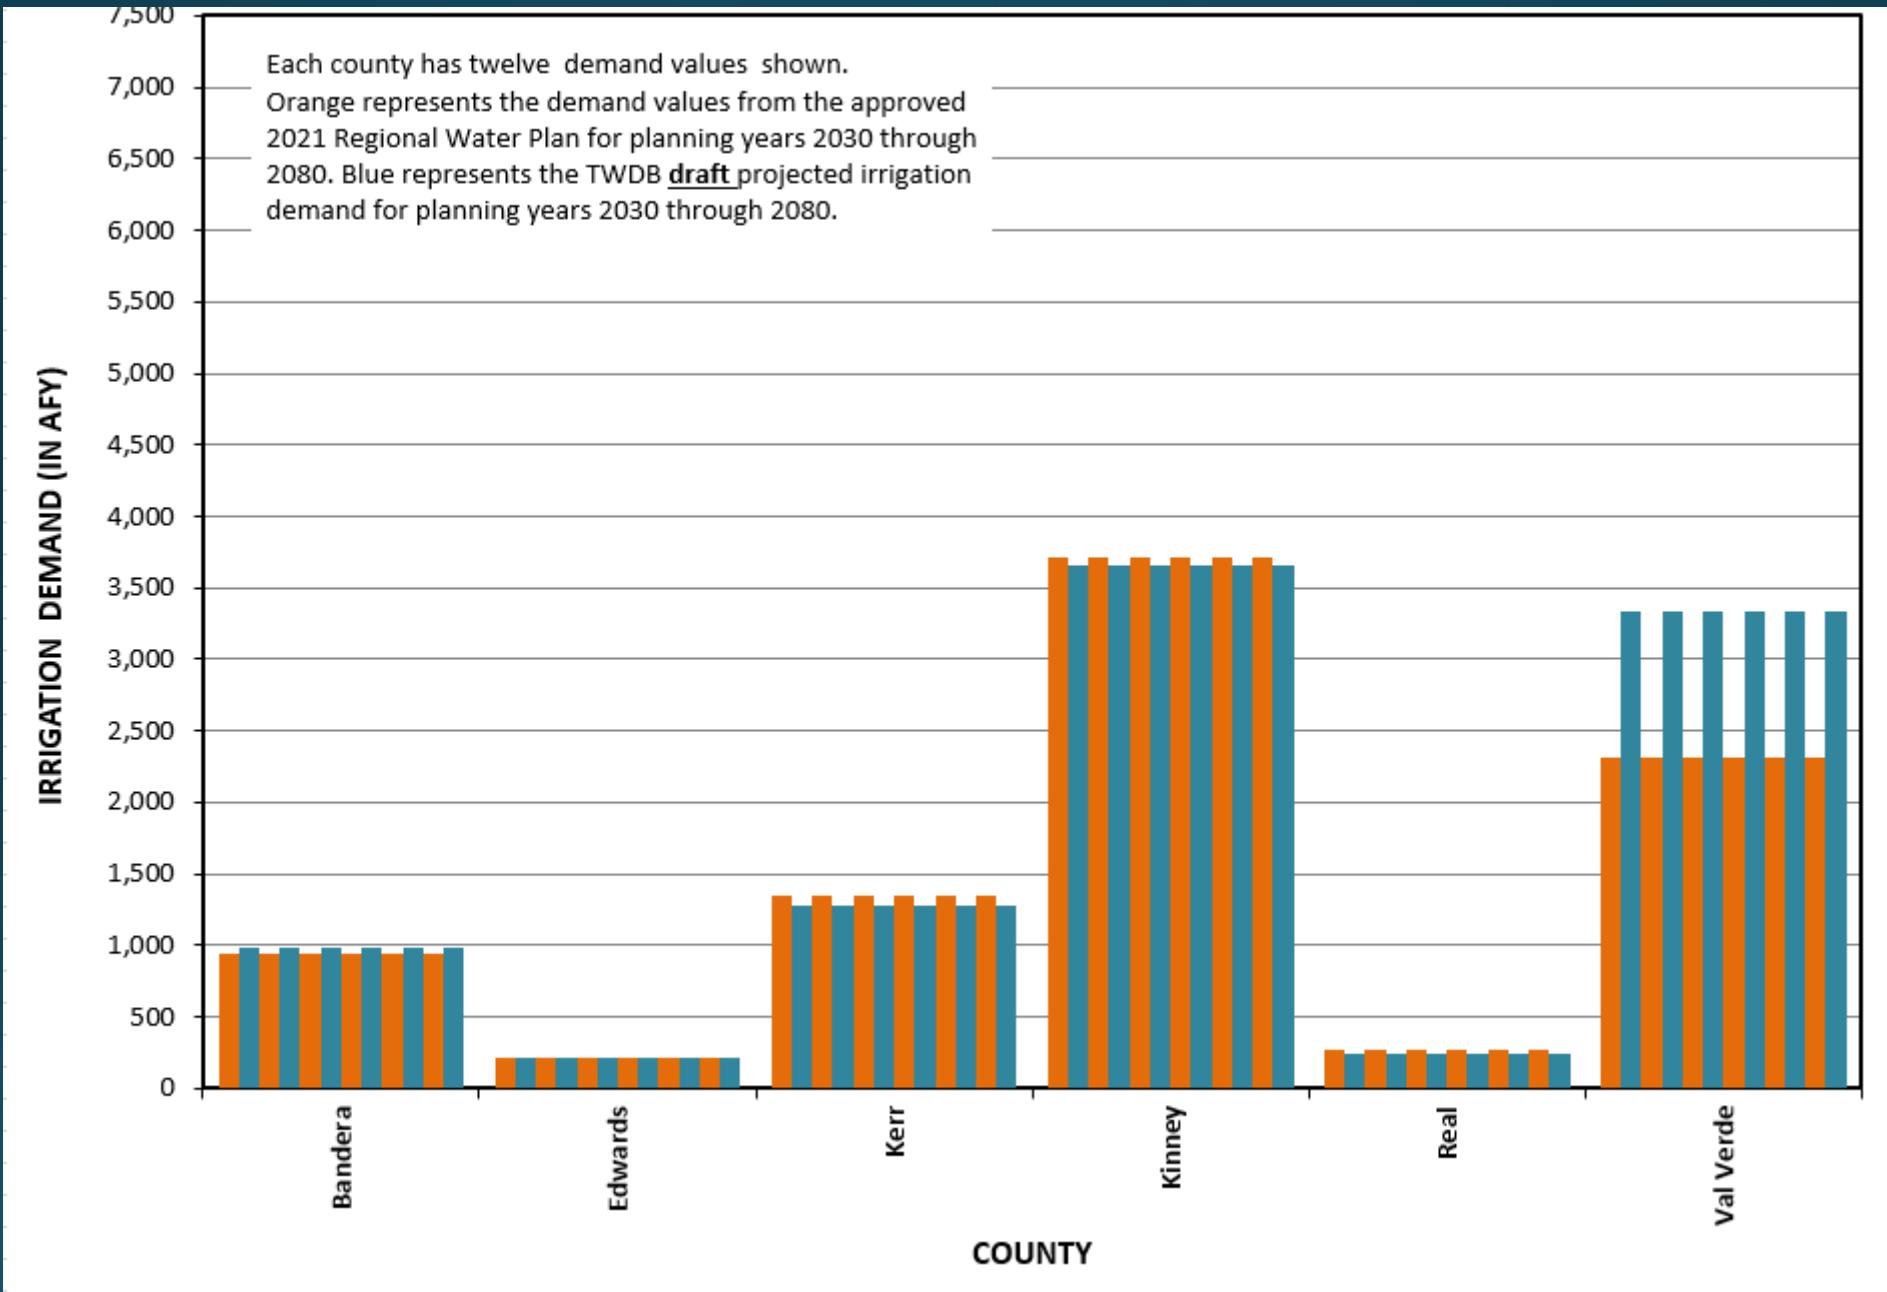

- **Jul. 14, 2023** – All non-municipal projection revisions are due back to the TWDB.
- **Aug. 11, 2023** – All population & municipal projection revisions are due back to the TWDB.
- **Mar. 4, 2024** – Identification of infeasible WMSs in the 2021 RWP analysis must be completed.
- **Mar. 4, 2024** – Technical Memorandum Due to TWDB

Review of Draft Non-Municipal Water Demand Projections

Irrigation Water Demand Projection Methodology

- No key changes from the previous planning cycle
- Baseline methodology is the five-year average annual water use estimates (2015-2019).
- Held constant between 2030 and 2080 or
- Counties where the total groundwater availability over the planning period is projected to be < than the groundwater portion of the baseline water demand projection, are held constant for ten years (2030 – 2040), then begin to decline depending on the groundwater availability.

Irrigation Water Demand Projections

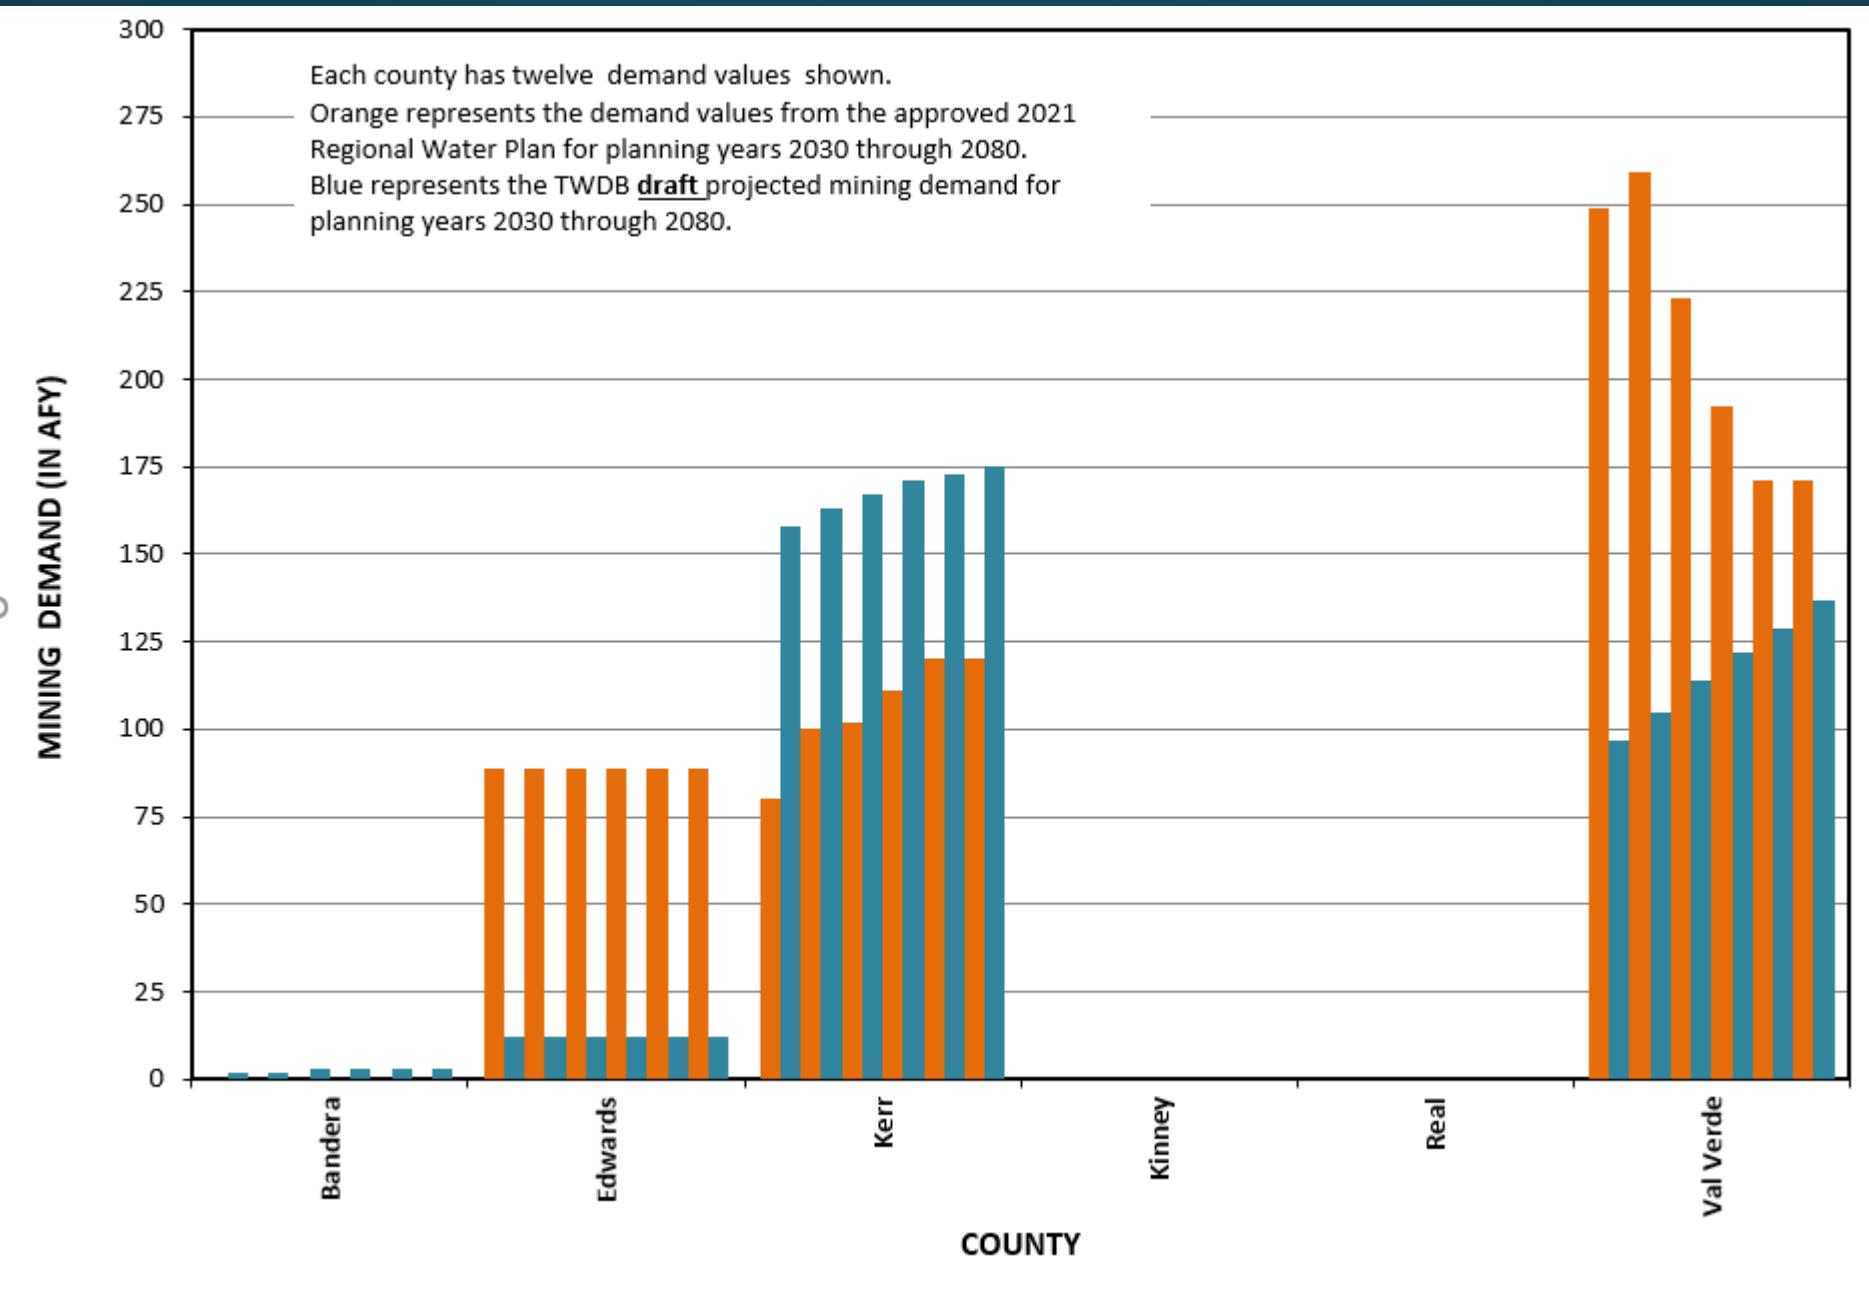

Max. Annual Historical Water Use Estimates (2011 - 2020) Handout #1 Irrigation

Mining Water Demand Projection Methodology

- **2022 Mining Water Use Study – USGS granted funding to the TWDB for a study on mining water use and projections through the Water Use and Research Data Program. Through a contract between TWDB and University of Texas Bureau of Economic Geology, the 2011-2012 study has been updated.**
- **Comprehensive and quantitative assessment of mining water use across Texas. This information will be utilized in the 2026 Regional Water Plans and the 2027 State Water Plan.**
- **<https://www.twdb.texas.gov/waterplanning/data/projections/MiningStudy/index.asp>**

Mining Water Demand Projections

Max. Annual Historical Water Use Estimates (2011 - 2020) Handout #2 Mining

Livestock Water Demand Projection Methodology

- **No key changes from the previous planning cycle**
- **Baseline methodology is the five-year average annual water use estimates (2015-2019).**
- **Decade specific water use trends from the previous water planning cycle were applied to the five-year estimate average baseline.**
- **Year 2070 projections were held constant through the draft year 2080 projections.**

Livestock Water Demand Projections

Max. Annual Historical Water Use Estimates (2011 - 2020) Handout #3 Livestock

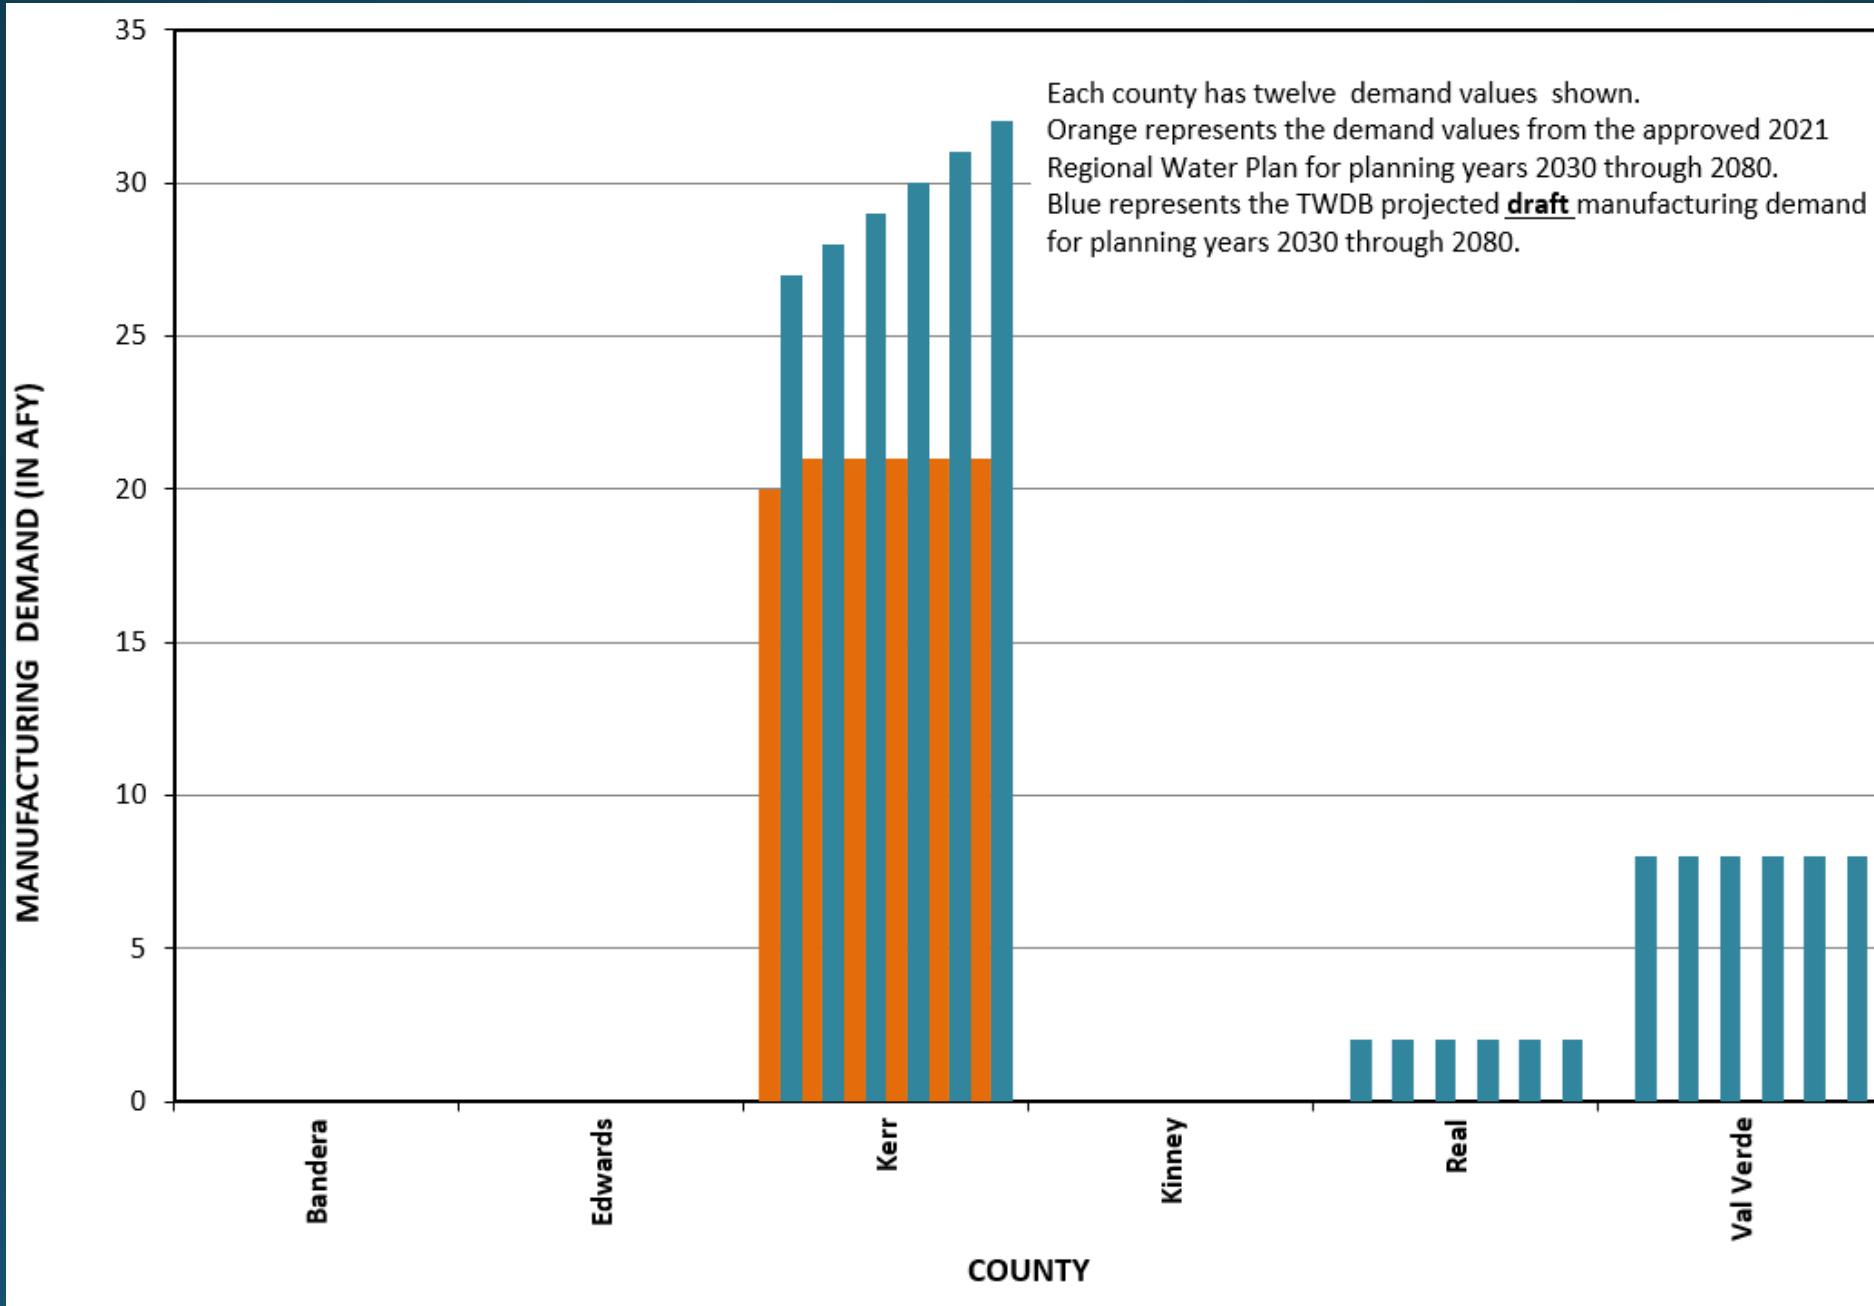

Table 3. Maximum Annual Historical Water Use vs 2026 Draft Livestock Water Demand Projections

Positive Value > 100							

Manufacturing Water Demand Projection Methodology

- **Key changes from the previous planning cycle – demands were projected linearly using County Business Patterns historical number of manufacturing establishments, rather than holding projected demands constant**
- **Based upon the highest region-county manufacturing water use in the most recent five-years of aggregated data (2015-2019) from the annual water use survey (WUS)**
- **WUS used in the max year calculation consist of gross intake minus any sales to other entities**
- **Like the 2021 Plan, fresh surface water and groundwater were included. Additionally, volumes of reuse water, such as treated effluent and brackish groundwater were included in the historical water use estimates & demand projections**
 - **Saline surface water was not included in draft projections**

Manufacturing Water Demand Projections

* No water demand reported for the remaining counties

Positive Value < 100

Positive Value > 100

Neg. Value (-)

WSP recommends NOT using this value

Steam-Electric Power Water Demand Projection Methodology

- **No SEP demands within the Plateau Region**
- **No key changes from the previous planning cycle**
- **Based on the highest single-year county water use from within the most recent five-years (2015-2019) data from the WUS**
- **Near-term additions and retirements of generating facilities**
- **Holding the projected water demand volumes constant through 2080**

Review of Draft Pop & Municipal Water Demand Projections

Population Projection Methodology

Key Changes from Previous Plan

- For the 2026 RWPs – the draft county population projections followed the trends projected by the Texas Demographic Center (TDC), including declines.
- In the past – the TWDB had altered the resulting regional plan population projections in certain counties, by holding them flat in future periods, to avoid projecting declining populations.

Population Projection Methodology

2-Step Process

- **Step 1: County-Level Projections**

- Based on TDC's County-Level Projections
- Used the Cohort Component Method
 - Age/**sex/race/ethnicity**
 - Birth rates/death rates/migration rates
- Two Migration Scenarios
 - Full-Migration
 - Half-Migration
- 2030-2060
 - TDC performs a 30-year projection
 - TWDB extends to 50-years
- <https://demographics.Texas.gov/Data/TPEPP/Projections>

Population Projection Methodology

2-Step Process

- **Step 2: WUG-Level Projections**

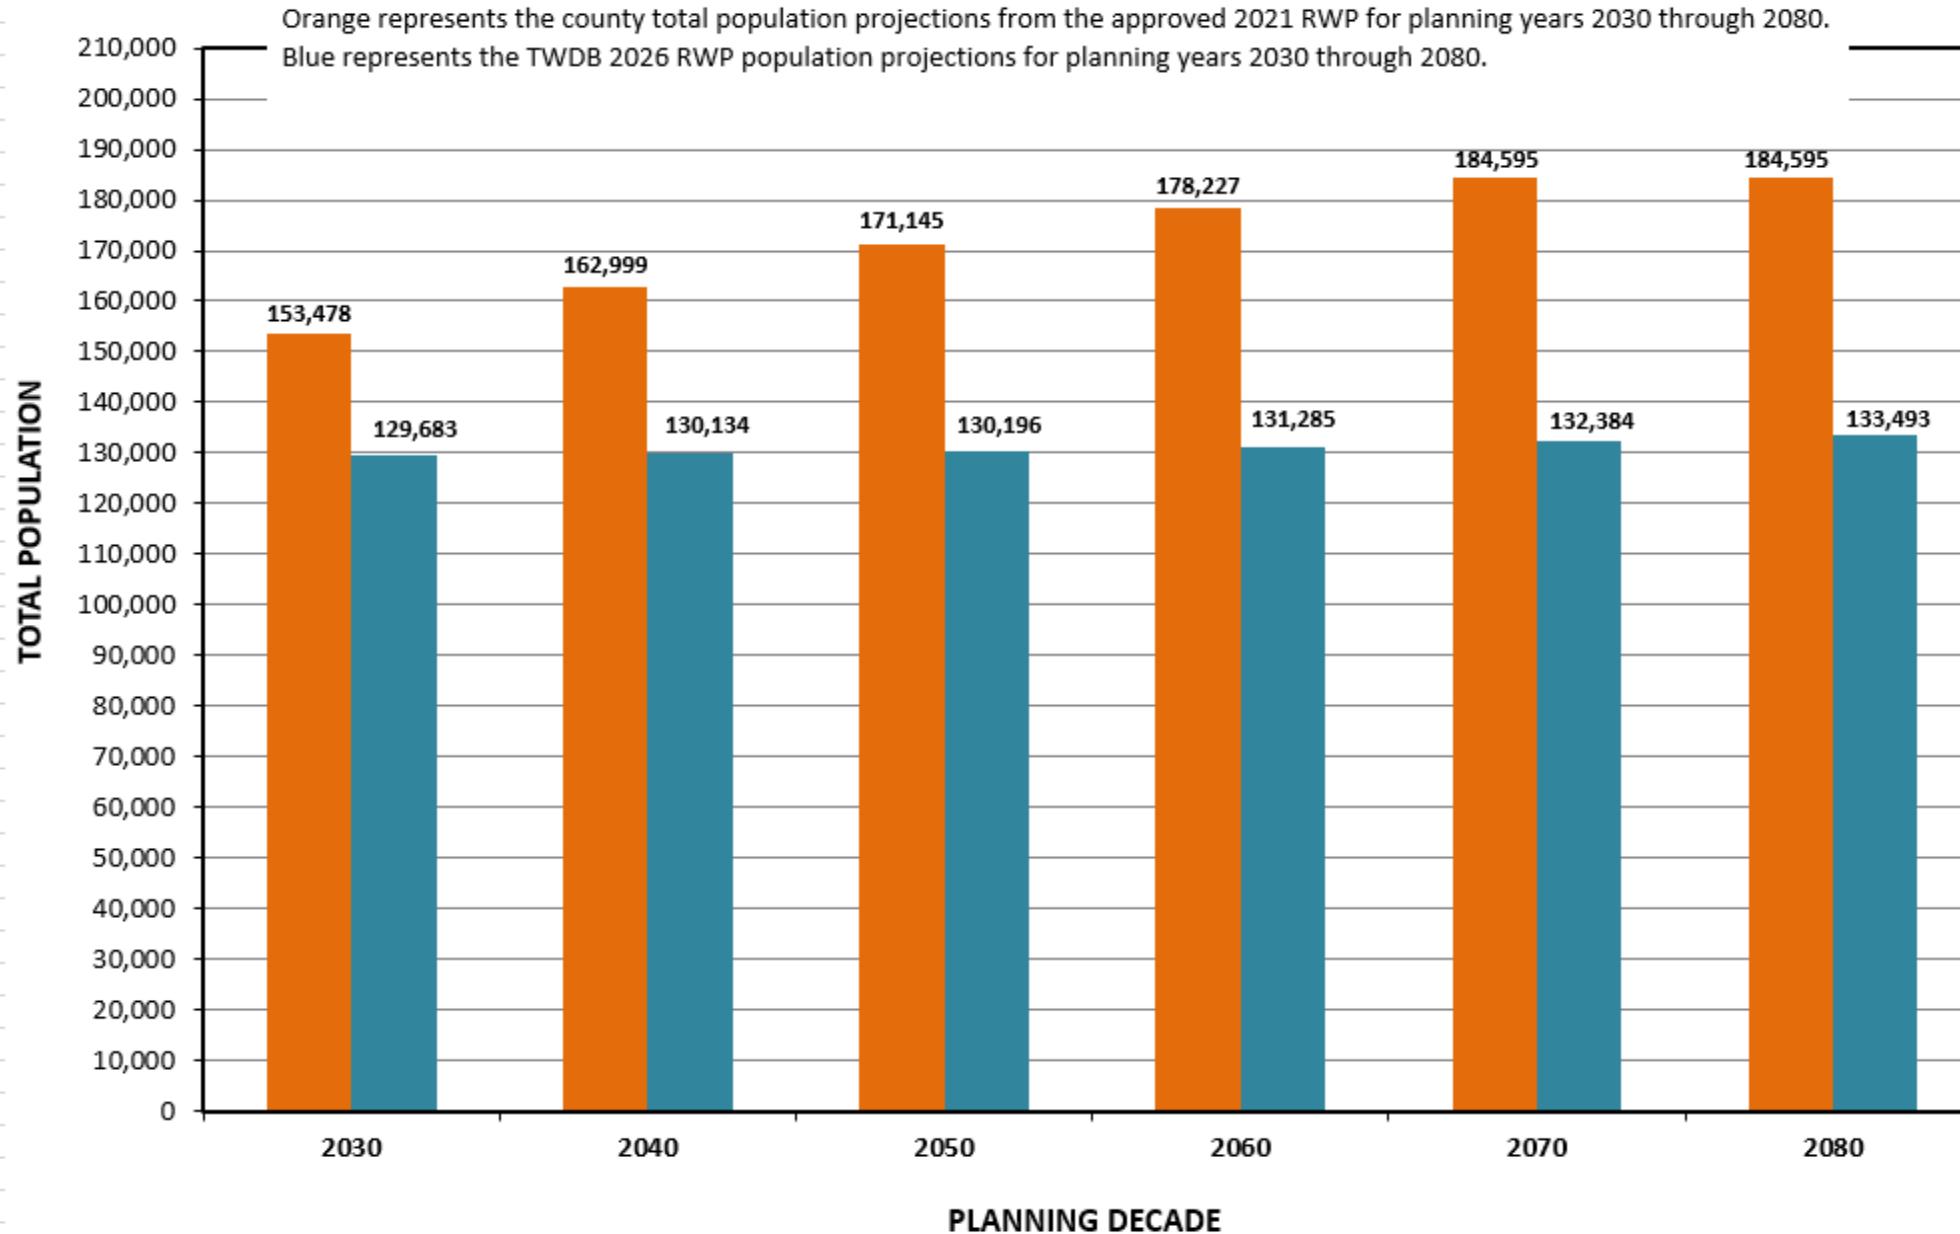

- Sub-Allocate to WUGs
- Applying the WUGs historical (2010 to 2020) share of the region-county's growth to future growth
- Applying the WUGs 2020 share of the region-county's 2020 pop. to the region-county's projected pop each decade
- Constant Population: military bases, universities, primarily group quarter population
- Buildout: WUGs with buildout in the 2021 RWPs were held constant at or near their buildout population from the previous planning cycle

Population Projection Methodology Summary

- TWDB projections newly released
 - Region-County projections 2030-2080: two migration scenarios
 - WUG projections 2030-2080: only full-migration scenario
- RWPG has the option to revise to use half-migration scenario
- Ongoing coordination with RWGP, Consultants and TWDB

RWP 2021 vs. RWP 2026 - REGION TOTALS

POPULATION PROJECTIONS BY PLANNING DECADE

Population projection by the TWDB using the full-migration scenario

Note: WSP recommended GPCD value

Summary

- **Approve the non-municipal water demand projections**
 - Utilizing the max. annual historical water use estimates
 - Revision requests due July 14, 2023
- **Consideration of additional conservatism in estimates**
 - Utilization of 1.0 vs. 0.5 migration scenario
 - Remove passive savings assumptions from proposed 2026 baseline GPCD
 - Utilize the max. 'dry-year' GPCD (2010-2020)
- **Engagement**
 - Continue working with the TWDB

* Revision requests for pop. & municipal water demands due August 11, 2023

Next Meeting

JULY 2023 ??

Note: WSP recommended GPCD value

The background of the slide is a photograph of a natural landscape. A river or stream flows from the center-left towards the right, surrounded by dense green trees and bushes. The sky is overcast with heavy clouds. A large, semi-transparent white circle covers the upper half of the slide, containing the main text.

Plateau Water Planning Group

April 20, 2023

Item IX.

Reappoint Officers

Item IX.

- Consider discuss and take appropriate action to reappoint officers for an additional 2-year term
 - Chair: Jonathan Letz
 - Vice Chair: Genell Hobbs
 - Secretary: Gene Williams

Plateau Water Planning Group

April 20, 2023

Item X.

Audio Visual Equipment

Item X.

- Consider discuss and take appropriate action to purchase audio visual equipment in order to meet Open Meetings Act requirements for video conferences.
 - Improve consistency of audio for Zoom participants
 - Establish video and audio of members present in auditorium
 - Dedicated equipment for PWPG
 - Not reimbursable expenses through current TWDB contract
 - Purchase through SSBT PWPG account managed by Kerr County

Proposed Sound and Audio Improvements

To Achieve Open Meetings Act Requirements for Video Conferences

- **Sound equipment for audience audio in Zoom call**
 - Alesis MultiMix 4 USB FX 4 Channel Compact Studio Mixer – **\$149.00**
 - innopow 200-Channel Wireless Microphones System – **\$142.99**
 - Short XLR Cables (X2) – **\$11.87**
- **Audio/Video for Chair, podium, and audience**
 - TONGVEO 20X zoom USB PTZ Camera (for clear video of audience) – **\$360.00**
 - Tripod for PTZ Camera – **\$49.99**
 - Logitech Brio 4k webcam bundle (for Chair audio and video) – **\$129.99**
 - Powered USB hub (for centralized location of USB devices) – **\$16.99**
 - 25 ft HDMI Cable (from secondary computer to projector) – **\$22.99**
 - 15 ft USB Extender (from USB hub to PTZ) – **\$10.99**
 - 15 ft USB Extender (from control computer to USB hub) – **\$10.99**
 - Tote for equipment storage – **\$29.99**
- **Contingency for minor price changes: \$115.00**
- **Total Not to Exceed: \$1,050.00**
